Although deprecated, the figure bellow is the basis of VCPS and OPS. It is displayed here for completeness of exposition and as support for discussions within this article.
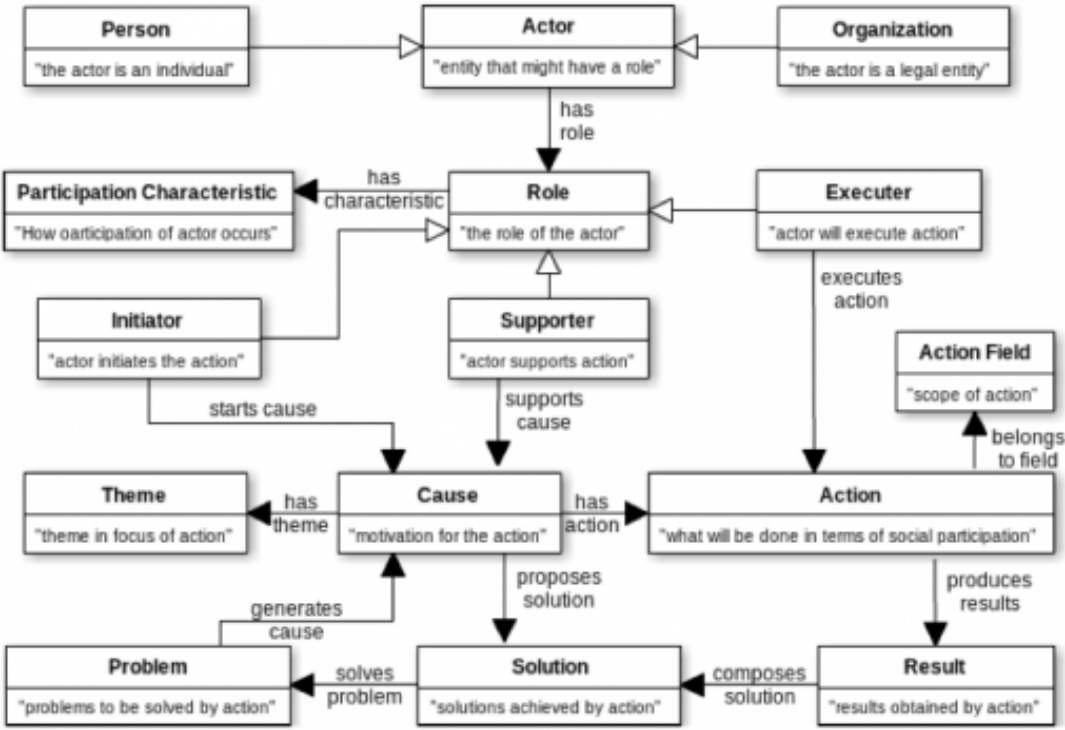

Figure S3-1: Original VCPS diagram. Although there were substantial OWL modifications, the main difference in the diagram is that the class `Role` was removed, as a `Role` is not able to start, execute or support anything. That is done by the Social Actor, as exposed in Figure 2 of the main document.
